

Drako 250H

Product information

Ideal for the heavy duty roped hydraulic elevator, requiring only minimum maintenance.

- 8-strand steel core rope
- flexible, with good fatigue bending properties
- low rope diameter reduction in loaded condition, also after long periods
- low elastic and plastic elongation
- rope grade 1770 leads to very high breaking strength

Rope construction: 8x19W-IWRC

Marking: According to standard

Standard: EN 12385-5
