Multi-Stick, Telescopic Forankra

Product information

Forankra
Secures everything in transit™

Forankra's newly developed Multi-Stick is a tool that makes the truck driver's cargo securing ergonomic, safer and more efficient. Multi-Stick can be used in most situations where it is difficult to access different areas due to height or distance, such as placements of lashings or corner protection.

With Multi-Stick you get three functions in one. To the adjustable teleskopic handle there are three interchangeable top parts which enables easy handling and positioning of lashings, corner protections or tarpaulin slats.

The telescopic handle has low weight and adjustable length of 1-2,5m, which makes it easy and flexible to use while the hard-to-reach areas can be accessed in a safe and ergonomic way.
