Wire rope 6x7-WSC class A

Product information

The 6x7 steel wire rope is specially designed to meet the demands of mountain applications and wall protection.
Thanks to its Class A galvanization, this wire rope offers superior corrosion resistance compared to Class B galvanized wire ropes, ensuring increased durability even in the most extreme conditions.

Features:

- Class A Galvanization: Class A galvanization provides optimal protection against corrosion, extending the wire rope's lifespan and reducing maintenance needs.
- Static Use: These wire ropes are non-greased, making them ideal for generally static applications where mobility is not required, thus offering maximum safety for wall protection installations.
- Applications: Perfectly suited for mountain environments, this wire rope is ideal for wall protection, securing high-risk areas, and fixed installations at altitude
