RUD INOX-STAR Lifting Eye Bolt

Product information

The RUD INOX-STAR® is a stainless steel lifting eyebolt designed for industrial lifting applications requiring corrosion resistance and multidirectional loading. Its 360° rotatable design allows alignment with the load direction, while the duplex stainless steel construction provides high resistance to seawater and environments with elevated chloride concentrations.

Best used for:

- Lifting applications in marine and chloride-rich environments.
- Threaded or through-hole installations requiring multidirectional load attachment.

Product benefits:

- 360° rotatable design enables alignment with different loading directions.
- Duplex stainless steel 1.4462 provides high resistance to seawater and chloride exposure.
- Variable bolt lengths support installation in threaded and through holes.
- 100% electromagnetic crack testing of load-bearing components supports quality assurance.

Material: Duplex Steel 1.4462
Temperature range: -40°C up to +280°C

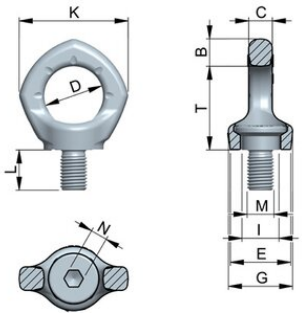

Safety factor: 4:1
